

Ergonomic workstation with electric height adjustment | QUALIPOST 3200 ERGO

Reference : 2

Description :

Electric and ergonomic industrial workstation Performance and comfort on a daily basis In industrial environments, ergonomics and efficiency are essential. Our electric and ergonomic workstation | QUALIPOST 3200 ERGO has been designed to meet the requirements of professionals seeking comfort, productivity and safety. Thanks to its electric adjustment system, it adapts perfectly to each user and each task, thus ensuring a reduction in MSDs (musculoskeletal disorders) and better operational efficiency. Main features:- Precise electric adjustment: Easily adjust the height of the worktop from 660 mm to 1310 mm thanks to the simple control with up and down buttons fixed under the top to adapt to each user.

- Maximum load: Capable of supporting up to 320 kg.
- Robust top: 28 mm thick grey laminate worktop, resistant to shocks and wear.
- Adjustable glides: Ensure perfect stability on all types of floors, even uneven surfaces.
- Modularity and adaptability: Many ergonomic accessories from the WORKSHOP FURNITURE range are compatible: back, casters, drawers, shelves or screen supports.

User benefits:- Optimal comfort: Less fatigue thanks to the ability to alternate between sitting and standing.

- Improved health: Significant reduction in MSDs thanks to adapted ergonomic positions.
- Increased productivity: A comfortable posture allows you to maintain concentration for longer. Better posture = Less fatigue = more efficiency
- Robustness and durability: Reinforced steel structure for stability and intensive use in an industrial environment.
