

Workshop standing seat with backrest | WORKSHOP STANDING SEAT CLASSIC

Reference : 69

Description :

The workshop standing seat distribute the weight of the body between the seat and the ground 50% evenly, thus promoting a dynamic position: the user can naturally straighten his legs and get up without effort. - The height has a 350 mm/13.78 Inch adjustment

- The base does not impair movement
- The upright position preserves total mobility
- Polyurethane seat (washable, withstands oil, solvents, shock, and tool slashes)
- An original, elegant design
- Authorized weight load approximately 120 kg/264.55 lb

Benefits :

- The sit/stand stool reduces fatigue while leaving you free to move.
- Its polyurethane seat provides excellent resistance to shocks, cuts and liquid splashes.
- Its seat distributes the weight of the body both partially on the seat and on the feet.
- The 350 mm height adjustment allows it to be used in a sitting position such as a stool or in a semi standing position.
- The backrest provides stable support for specific procedures that do not require a fully seated position.
- Can support loads up to 120 kg.
