

Transparent card adapter for plastic bin | Transparent adapter

Reference : 308

Description :

The range of SUPPORT FOR KANBAN makes it possible to answer all the uses of identification in production (containers parts, components, cardboards etc) to be clearly identified by a readable, accessible and visual map.

Benefits :

- Transparent holder very practical to identify your KLT format plastic containers.
- This adapter is easily positioned between the edges of your body. Once installed, slide your Kanban card into the holder to simply identify your bin. The most? The support is perfectly maintained and can remain permanently on the body.
- For even more simplicity, print your information on paper to the dimensions of the Kanban cards using SESA'PRINT.
