

Quality control LED light 220 V | LED control light

Reference : 620

Description :

This LED control light is designed for visual control of the quality of small items, plastics, glass or PET bottles, specific to the food manufacturing industry. The light creates the ideal conditions for visual inspection and showing flaws or any other concerns. The control light offers uniform, even lighting of items to be checked. The light box has a solid aluminum structure and PVC reflective upper surface. Resistant and practical, it can be used horizontally, vertically or on the workstation for easy control of transparent and translucent materials (glass, fabric, printed circuits etc.) or for checking the level and quality of liquid in a bottle. - With dimmer

- European standard electrical outlet

Benefits :

- The control luminaire is essential for the visual quality control of fine parts, plastics, bottles...
- Resistant and practical, it can be used in horizontal or vertical position.
- This lighting provides uniform, diffuse and homogeneous light on the parts to be controlled.
- The light box is equipped with a solid aluminium structure and a diffusing PVC upper face.
- Energy-saving LED lamps.
