

Videoconference camera

Reference : 18523

Description :

Video conference in small groups is now possible with ease, thanks to this complete solution: webcam, microphone and speaker. Groups can now collaborate by video from anywhere, without having to fight over a spot to take advantage of the equipped conference room or huddle around a single computer for a simple video conference meeting. - Full HD 1080p video resolution

- Carl Zeiss optics with autofocus
- 78 degree field of view and 180 degree panoramic video
- Noise-canceling full-duplex speakerphone with echo cancellation
- Remote control of your calls via the remote control

Benefits :

- With its compact size and motorized camera, the system is specifically designed for small groups.
- The camera offers plug-and-play USB connectivity for Windows® and Mac computers, and works with most video conferencing applications.
- Eye contact helps you build stronger connections, especially when you need to establish a new relationship, support a client, or collaborate with a team spread across multiple locations.
