
Wireless display receiver

Reference : 18557

Description :

The Wireless Display Receiver eliminates the hassle of cables and adapters so users can manage content from anywhere in the room and collaborate wirelessly. The included management software allows the device to be used for other tasks during a presentation. Thus a collaborator will be able to watch, modify or record in turn. Whether you need wireless display in a classroom or conference room, the Display Receiver easily connects to displays, projectors, control systems, and Skype Room systems via HDMI and USB.

Benefits :

- Eliminate the hassle of cables and adapters so users easily connect in any room.
- Easily share any form of content: videos, images, slides, etc.
- Native wireless screen mirroring means no apps or wires needed.
