
Under-chassis storage box

Reference : 18708

Description :

The large-width steel box is generally used for storage spaces requiring robustness and capacity. It fits easily under the frame of your workstation for storing heavy tools or bulky materials.

Benefits :

- Effective and total protection of your tools in your workshops thanks to the lock
- Drawers sliding at 90% of their depth on precision slides
- Robust steel sheet construction for durable use in industrial environments
