
Customizable light-up curved headband

Reference : 18682

Description :

The customizable curved light strip with LED backlighting allows you to identify a work area even at night and on less bright days. The oval shape of the strip is optimally designed for LED lighting. You can use the Andon method to standardize your workshop, signaling problems or breakdowns with a change in color, such as turning the banner red to indicate an incident. - 19 modes in total, adjustable speed and intensity

- 20 fixed colors
- Approximately 15 meters of potted material for using the remote control
- 12 Volt RGB LED strip
- Connected to the mains with a 1500 mm L cable
- Text to be specified when ordering
- BAT validation period in addition

Benefits :

- Allows you to effectively identify an area or workstation in production workshops or offices
- Customizable for durable signage that reflects your image
- Wired and ready-to-install light strip
- Offers improved visibility thanks to their brightness that can be adjusted in intensity and speed
