

INOX Hydroalcoholic gel dispenser

This 304L stainless steel dispenser requires no installation and can be set up anywhere (self-stable) or fixed to the ground. Its system is 100% mechanical, so you will not need to provide an electrical connection or generate additional costs for its installation and maintenance.

Made entirely of brushed 304L stainless steel grain 220, our disinfectant terminal is durable and robust. In addition to being very resistant, stainless steel is the most hygienic material, it is commonly used in catering, in the medical environment or in the food industry. The smooth surface of the stainless steel prevents bacteria from entering, it is also a material that is very easy to clean.

This column of hydroalcoholic gel can be useful in all places open to the public: Hospitals, pharmacies, medical offices, banks, schools, shopping centers, communities, town halls, restaurants, gyms, grocery stores, shops ... You can place it at strategic places such as toilets, entrances, reception counters, receptions, offices, kitchens.
